### "The Marriage Clause"

*Can Love Call a Woman Back From the Dead*

With Billie Dove and Francis X. Bushman

"Barry!" she whispered in her delirium—ever so faintly. It was the loved name. The doctors shook their heads—when suddenly there burst through the door a man. Who was he? from whence did he come, this unknown vagabond who flew to the bedside and tenderly lifted the dying woman in his arms? That's one of the biggest moments ever filmed; and it'll wring your heart and draw from you tears of compassion and tenderness. Your deepest emotions will be subtly touched by this marvelous story of a great and devoted love.

## 2 Reel Comedy

COMING NEXT WEEK

"The Scarlet West"

## Alston Dance Well Attended

The hard time dance, held at Alston on Friday evening, March 25th, drew a bumper crowd and was thoroughly enjoyed by everyone. The Harmony Night Hawks' orchestra which supplied the music covered themselves with laurels in the class of music supplied. The personnel of the orchestra was as follows: Miss Doris Allen, pianist; Mr. Bular, saxophone; C. Drummond, violin; C. Brownbill, banjo; O. Sommers, drums.

Mr. W. M. Isaacson was chosen as delegate to represent the Golden Rule W.L. at a conference held in Medicine Hat, and visited friends at Raymond en route.

J. T. Stephenson was a visitor to Calgary during the week.

Note F. J. Clapp's advt. re boy's shoes. It will interest you.

Mr. and Mrs. J. Lobban entertained a number of young people on Sunday.

Mrs. J. M. Moffatt was the hostess at a bridge party on Monday evening.

H. Anderson and wife returned home recently after spending the winter months at coast points.

Born—On Thursday morning, at Mrs. Morrison's nursing home, to Mr. and Mrs. H. H. Barnes, a daughter.

Mrs. Fred Clever and daughter, Laureta, returned from Seattle and Portland, where they had spent the winter.

Mr. Manitof, formerly of the Canadian Bank of Commerce staff here, has been transferred from Calgary to Taber.

The part of our population which toured during the winter is beginning to return home and the rural population, particularly, will soon be at normal again.

The Champion W.L. will meet at the home of Mrs. Ryan on Thursday next. A musical afternoon with Mrs. Letif and Mrs. Bond in charge will be the feature.

C. J. Schroeder's sale on Wednesday was largely attended and the prices realized were eminently satisfactory. As usual Art Hopkins handled the hammer.

Mrs. F. C. Aleck and Mrs. R. S. Bond left on Tuesday to attend the District Conference of the Women's Institute for Southern Alberta, being held this week at Medicine Hat.

F. J. Beingsenor's auction sale on Tuesday, March 15th, is attracting an unusual amount of attention, as the quality of the stock offered is excellent and other items are of high grade? Don't miss this sale.

Rev. and Mrs. Lee, of Barons, passed through town on Saturday, taking little Brian home from the hospital. The baby was fully recovered some weeks ago, but an attack of whooping cough forced a further delay.

Over 200,000 dollars was paid by the people in the province in taxes last year. In tax during the past year of this amount, the four cities paid something like \$150,000. The city of Champion brought \$422,700 during the year, a considerable increase over the previous year. The automobile licenses brought \$1,154,000, there being a total of 64,129 licenses, an increase of more than 11,000 over 1925.

## Board of Trade After Hydro Power

Champion Board of Trade met on Friday evening and appointed a delegate to join other towns on this line in interviewing the Calgary Power Co., with reference to hydro developments on this line. The meeting has been put off for about two weeks by the company in order to permit of a definite answer being given to the delegation. A. McCullough will represent Champion.

## Sheep Raising Becoming Popular

Many farmers in Alberta are now running small flocks of sheep on their farms. The fact that the day of the small farm flock idea, is indicated by the fact that the Southern Alberta Wool Growers' Association now has more than 350 members, in the place of some 60 members five years ago.

There is plenty of room for expansion in the sheep industry on the basis of the small farm flock idea, however, for Canada as yet is producing less than 5,000,000 dollars worth of wool, while it imports sum 46,000,000 dollars worth of woolen goods. Farmers who desire to start farm flocks are advised to write to the Alberta Department of Agriculture at Edmonton for pamphlets.

Sheep in two stages—reinsears, three actual stage performances and the love story of the players themselves the most dramatic of all. Don't miss "The Marriage Clause"—the greatest love-story ever screened.

Mrs. A. McKibbin left for Cariboo this week, where Mr. McKibbin has secured a drug business. She will be missed here, especially in musical circles, where her outstanding ability as a pianist was widely recognized.

The McNaughton cup is again held in Champion. The rinks which brought the trophy home on Monday night were: C. McLean, skip: A. Woodhull, J. Bennett, J. T. Steepson; B. N. Woodhull, skip: A. W. Jopling, A. Baker and J. S. Collins.

Irv. Fisher has taken over the water business formerly carried on by C. Schroeder. During the week these families exchanged residences, Mr. Schroeder and family as a temporary arrangement until they decide just where they will locate permanently.

The Alberta Government has balanced its accounts for the year 1926, with a small surplus, which was announced by Premier Brownelee to the Legislature this week. The surplus will not be as large as at first estimated, owing to the added costs of the general election.

The winter, which appears to be passing, has been a decidedly pleasant one. There was a fair amount of cold weather, rather above the average snowfall and many days when high winds made things unpleasant, but on the whole the majority view was that it was a perfect winter.

Messrs. Hoskins and Roberts have secured the Pontiac agency for a considerable district, centering on Champion and already have two carloads of cars moving to this point. Note their announcement elsewhere in this issue.

## EXTRA VALUE

**\$3.95**

A Work Shoe that will stand hard wear and give real foot comfort. Elk Stitchdowns with the genuine Pancho Sole. They are extra soft and pliable.

## March 8th

A representative of **LAILEY TRIMBLE LTD.** "Master Clothes Builders," will be here with a large set of samples and models. Come in and be measured for that new Spring or Summer Suits.

Legal advertisements, 15 cents per line for first insertion, 12 cents per line for each subsequent insertion.

Advertisements of Wanted, Lost, Found, Strayed, etc., not exceeding one inch, 50 cents for first insertion, 35 cents for each subsequent insertion.

Commercial rates on application.

THURSDAY, MAR. 3, 1927

## Advertising Alberta

(Upland, California, News.)

That the province of Alberta is one of the most progressive in the Dominion of Canada was the statement made by Mrs. Jackson N. Beaubier, in a speech before members of the Island Business and Professional Women's club meeting at the Davis' Cafe yesterday noon. Mrs. Beaubier, who has spent eleven years as a resident of Champion, Alberta, Canada, is particularly well versed in the knowledge of the Canadian provinces, as for four years she was president of the Women's Institute which corresponds to that of president of the state club federation here. The speaker took her audience to Canada in her graphic descriptions of conditions there.

Wheat is the main industry of Alberta, but the mining of coal, of which one seventh of the world's output is mined here, runs a close second. Oil and gas are plentiful, and there is such an abundance of the latter that in the town of Medicine Hat the lights are kept burning night and day as it is cheaper to burn gas than to pay some one to turn it off. The whole of Canada is called the Dominion of Canada, said Mrs. Beaubier, and extends from the United States boundary

line on the south way up to the North pole on the North and from the Atlantic to the Pacific oceans on the East and West. The Dominion is divided into seven provinces each, having separate governments with the capital of the Dominion at Ottawa. The senate is appointive while the representative assembly is elected, both to be governed by a governor or premier, as he is called in Canada. In the provinces the representatives are elected and the leader of the victorious party is most generally elected Premier.

The city of Edmonton, which is the capital of Alberta, has besides its beautiful parliament buildings, a university, wonderful library and many fine business blocks. The population is between sixty five and seventy thousand.

Calgary city is about the same size as Edmonton, and here also are many fine public buildings and sky scrapers. Lethbridge, another town not far from Mrs. Beaubier's home is noted for its proximity to Wainwright National Park where 10,000 head of buffalo roam at large.

Mrs. Beaubier closed her speech by quoting the Texas cowboy, who on viewing the Canadian Rockies said, "Hurrah for God."

## PUBLIC INSTITUTIONS

Galt Hospital, Lethbridge

First-class Hospital Service at Government Rates. Private, Semi-Private, and Public Ward accommodation for surgical and medical cases.

Separate Case Room for obstetrical patients.

X-Ray, Bio-Chemical Laboratory, and all modern hospital facilities controlled by fully trained operators.

Registered Graduate Nurses in charge of hospital, under direct supervision of Provincial Department of Public Health affording maximum protection to public.

Second for nurses.

Inspection invited. Write for full particulars. Enquiries willingly answered.

## Some Encouraging Signs Show Better Planning of Towns is Now Taking Hold in Canada

Town planning is making slow but certain progress in Canada, according to the report of the committee on town planning of the Dominion Land Surveyors' Association, compiled by D. H. Hartley, D.L.S.

The committee finds, in reviewing the progress of town planning in this world-wide movement, that there are some encouraging signs that better planning of towns and cities is catching on in the Dominion. From that to what is said is that the most encouraging signs are an awakening consciousness as to the benefits to be derived. In Montreal the movement is voluntary, an organization having been formed for the development of a plan which is hardly trial to put into effect. In the operation of an official city plan government and financed by a regional plan.

Industrial companies find the growth of a provincial town planning act. The city has now appointed a town planning committee and consultant and staff to create a comprehensive plan for the city and environs at a cost of \$10,000, spread over three years. Surrounding municipalities probably will agree on a regional plan.

Industrial companies who are establishing great enterprises in Canada are locally aiding to the advancement of town planning in their town sites. Mr. Bartley reported. For instance, at Arvida, Que., the Aluminum Company of Canada is laying out the nucleus of a city for its employees on a grand scale, 10,000 employees, some 600 acres. They are proceeding on carefully prepared plans designed for an ultimate population of 40,000. Construction of 270 houses was completed in last year's program and the development of roads, sanitary and fire protection and landscape treatment.

In Western Canada the town planning movement is gathering momentum. In spite of the difficulties around Winnipeg we take steps toward the formation of town plans under Manitoba laws, and the City of Edmonton has announced its intention of establishing town planning boards in all towns and cities where Canadian cities in which definite progress has been made.

The report concluded: "It is suggested that the dominion government, for the advancement of town planning in Canada is a matter of education and persuasion and that the necessary enactments will inevitably follow. If in the development of our young Canadian cities we do not leave a definite mark on the map, the formation of slum and tenement districts, we will be in a far more advanced position than could be secured by any frantic efforts in the future to develop lavish civic monuments in an attempt to conceal the snarl of the neglected districts."

### The Village Blacksmith

**Business Was Never Better in This Trade—Than It Is Today**

Those who have seen the growth of the village blacksmiths with his mended arms and mended sevill, will dry their tears when they learn that the business of the village smithy was never better than it is today.

This fact was brought out at the annual meeting of the Manitoba Association of Blacksmiths, Horseshoers and Woodworkers, held in Winnipeg.

Although the old gips mares are dying out, the new "tin hats" the blacksmith still finds his bare damage with honest perspiration. Instead of fitting doddish with a new set of iron shoes, he is called upon to fix a broken gasket on the tractor and other mechanical repairs.

Business is good in the blacksmith trade, but it is difficult to get the rising generation to take it up. Blacksmiths immigrating from Europe must be relied upon to keep the trade going in the next generation. It was cold.

**Jean—"What are you so furious about?"**

**Mac—"Daisy called me an old cat!"**

**Jean—"Why, you're not so old."**

**Ied—"My dear girl, has he given you any encouragement?"**

**Ied—Well, last night he asked if you and mother were pleasant people to get good drainage.**

The word "highway" is said to come from the name of the old Roman road which was elevated as much as four feet above the surface to permit good drainage.

### Danzig Families for West

**Several Hundred to be Brought to Canada as Report**

According to reports, arrangements have been completed for the bringing out to the west of several hundred families from the Danzig Free State. This information is given by Rev. E. W. Hartley, president of the Lutheran Immigration Board, who has returned from a trip to Europe. While there he visited Germany where he interviewed the government officials and the people on emigration. As a result of his interview he expects heavier immigration from that country, this year.

The Lutheran Immigration Board, which has been organized in Europe, and also some Canadian settlers will be brought to Canada through activities of that organization, according to Mr. Schmolz.

**IDEAL fashions**  
by  
Ferdie & Hamilton

Clairlying here is the attractive bloomers dress pictured here and a style very easily fashioned. The front panel is made of a light fabric like opening on the kimono shoulders while a trim belt fastens in front. The back panel is made of a light top easing and at the lower edge of the legs. No. 1892 is in sizes 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30 yards 56-inch material, or 1 1/2 yards 54-inch, and 2 1/2 yard 36-inch cotton.

Our new fashion book contains directions for learning how to dress boys and girls. Simplicity is the rule for well-dressed children. Clothes for boys and girls are simple. The junior folks are hard to buy, but easy to make with our patterns. A small book, cut on simple lines, will give children the privilege of wearing adorable clothes. Price of the book 10 cents the copy.

### Seemed Good Suggestion

Fab buyer in store:—I want a present for a gentleman; will you assist me in my choice?

John:—Certainly, ma'am.

Fab buyer:—What is he suitable?

Fab buyer:—No. He has a beard.

Salesman:—How about a fancy waistcoat?

Fab buyer:—No. He has a very bad cold.

Salesman:—Then how about a pair of carpet slippers?

Fab buyer:—I want a present for a gentleman who can feel pain, says a scientist.

But the scientist is the only one that strikes back!

Men sometimes make money, but money never makes men.

### Describes Edison's Work

J. W. Lieb Tels Electric Light Body of Development of Lamp

John W. Lieb, vice-president and general manager of the New York Edison Company, told how Thomas A. Edison had developed a more practicable incandescent lamp at the dinner of the engineering section of the National Electric Light Association. He said that before Edison began his work on the lamp he devoted six or eight months to the gas industry, proving the closest parallel; that underground distribution similar to that used by gas companies was essential. He then began his work on the lamp, which was far greater than that aimed at by other experimenters, and on that basis he developed a lamp which would give a regular ten hours of light.

A revolution in the electric industry will be comparable to the revolution caused by the use of atomic energy, he said. He is president of the F. E. F. Research Institute of the Edison Company. He said he did not know what form the revolution would take, but was satisfied that research work now going on would bring it about in the near future.

### Dentist Advises Use of Milk

Says Average Modern Diet Lacking in Calcium and Phosphorus

At the Board of Trade meeting here, Dr. A. L. Hartley, secretary of the Faculty of Dentistry of the University of Toronto, took issue with the suggestion of Dr. J. Sim Wallace of England, who has been lecturing throughout Canada that the average modern diet is good for the teeth.

He said that the diet should

not be too rich, but should be

adequate to the diet of children

two years of age, after the deciduous teeth have erupted.

Dean Seconembe

stated that the average modern diet is generally lacking in the essential elements of calcium and phosphorus

and urged that milk be continued in the diet of children and also adults

because it contains in average serving more of the vital elements than are contained in any other food.

It was also stated by Dr. Hartley

that the teeth of the nation were suffering by over-indulgence in sweets and soft foods. Milk is an excellent food and should be used for solid food after articles of diet. A good food should be prepared that thorough mastication will be necessary, and this will assist materially in maintaining the health of the teeth.

There should be a check-up on adult immigrants and everyone should be made to attend special classes for foreigners, so that they can succeed even though they may not know the language, because there are no facilities to teach them.

### Should Be Compelled

To Learn English

Immigrants Who Understand Language Make Better Citizens

An Ontario magistrate recently made the suggestion that foreigners who could not speak English after so many years' residence in Canada should be given some form of punishment.

Rather drastic. But something should be done about it, and they seem to have the right method in Australia.

Every immigrant has to pass a language test. The failure to pass is a definite punishment.

If immigrants are never going to learn any language but their own, then let them stay in their own country. Unless they get a certain knowledge of the speech of the country they have come to they will never become citizens of their adopted land. It seems that they will heed to nothing, formula "I like Italy," "I like America," or whatever, they come from, continuing the habits of their native soil, making no attempt to Canadianize themselves so long as they stay along and make no effort to learn the language.

Of course in time their children will attend Canadian schools and speak the English language, but they will still only be half Canadianized because the immigrant's language will remain the home remnant will remain.

It is the language of the home which will remain the language of the family. It will take generations for immigrants of this type to become Canadians, whereas the process of assimilation is much more rapid in the day they arrive.

They should be a check-up on adult immigrants and everyone should be made to attend special classes for foreigners, so that they can succeed even though they may not know the language, because there are no facilities to teach them.

It is the language of the family

which the immigrant brings with him.

It is a matter of common observation that country-bred people are not so well educated than townsmen, either have a greater number of whisks which the several illustrations of native life do not breed.

For the purpose of education the country provides for more favorable material in some ways than the town, but in other ways the town is more worth a dollars to find innumerable subjects of interest and inquiry in the town and every common life.

The boy who is not much interested in the study of arithmetic and geometry is at an advantage as compared with his fellow whose horizon is bounded by bricks and mortar, the endless monotony of the streets and the endless bustle of the factory and workshop.

Ted:—"Here comes Dave!" He won a golf cup and he'll talk us to death.

Jerry:—"Hurr! And here comes my cousin. He just bought a new radio. Let's introduce them to each other and leave them to their fate."

A woman writer advises girls never to marry men who talk loud. This advice is certainly sound.

Daniel is the only man we ever heard of who wasn't spoiled by being lionized.

Though a man conquer a thousand men in battle, a greater conquer still is he who conquers himself.

## STATES LIBERAL FISCAL POLICY IS UNCHANGED

OTTAWA.—Hon. C. A. Dunning, Minister of Railways, told the tariff policy of the Government before the House. The Minister of Railways declared that he was to say the Liberal fiscal policy was unchanged.

"We shall," Mr. Dunning said, "move forward cautiously with the aid of knowledge of the facts secured by our investigation, and the goal of making our tariff stand two hours as lightly as possible on production industry and the people generally, having always in view the general principles of the fiscal policy of the Canadian Government."

Premier Borden adjourned the debate with a view to the bringing in of a compromise amendment on which all those opposed to the motion might unite.

"The tariff must be made to serve the best interests of the Canadian people as a whole. It must be adjusted from time to time to meet the needs of our ever changing business, but not of our whole economic structure. This does not mean tariff taking, so-called, but does mean a continuous expert examination and adjustment whenever the need arises," he said.

A suggestion by E. J. Galt, L.E.A., Bow River, that there was an understanding between the two chief political parties brought protests of "No, not so" from the Liberal side.

Mr. Dunning was sympathetic in saying there had been no such understanding. Mr. Dunning also had a sharp exchange with J. A. Galt, Liberal Progressive (Marquette), who, earlier in the debate, was entitled to speak on behalf of the Progressive party.

Mr. Galt asked a question bearing on the declaration by Mr. Dunning. The Minister replied that an attempt was made last year to put a limit at the head of the bill.

Mr. Dunning said that the Ottawa House might lower the percentage to 65, which would bring Mr. Galt's share of the burden to possibly \$6,000,000 a year.

### To Protect Shareholders

Shareholders of Saskatchewan Co-Operative Elevator Co. to Benefit.

Regina.—Shareholders of the Saskatchewan Co-Operative Elevator Company will receive \$15,787 for the 1923-24 year, as compared with \$15,000 originally paid at 7.5 per cent. in the bill providing for the winding up of the company passes the Legislature in its present form. In other words, a shareholder holding 200 shares will receive \$78.85 for his shares on the basis of the method of distribution proposed in the bill.

Shares issued in preceding years will be worth proportionately less, the bill provides, and shareholders will receive \$12,787 under the method of the bill.

The difference is accounted for by the fact that the shares issued in different years are sold up in varying amounts ranging from \$12.50 for the 1913-14 season to \$75 for the last to be wound up, and the difference in the paid up value.

"Speculators" who planned to make a "killing" on these shares will be disappointed, as it is unlikely that the Premier Government will be induced to protect not only the delegates attending the annual meeting of the Elevator Company next week but the thousands of shareholders remaining in the country.

### Time Limit for Tourists

Automobiles Entering Canada From South May Now Stay for Sixty Days.

OTTAWA.—Permits for automobiles driven by tourists entering Canada have been extended from thirty to one hundred days, according to an announcement by Hon. W. B. Eddy, minister of customs and excise.

In the past, automobile entering Canada have been permitted to drive their cars in this country for a period of one or two days.

This period has now been extended to sixty days with the option of an extension to ninety days under certain restrictions.

It is understood that tourists will be required to remain the full limit of time to be required to present identification and credentials from authorized motor clubs or similar organizations. For some years past, however, the customs department has been interested in tourism, and the railway generally have been seeking to have the thirty-day restriction waived.

### Would Aid Boy Scouts

OTTAWA.—Suggestion that some portion of the 10 per cent. reduction in income tax, provided for by the revenue budget of Hon. J. A. Robb, minister of finance, should be paid to the Boy Scouts of Canada by the Boy Scouts' Association, Hon. P. B. Borden, Visecount Willingdon made an earnest plea for financial support to the association at a friendly luncheon here. His Excellency said he spoke on behalf of the Canadian Boy Scouts.

Advises for Carrillon

OTTAWA.—For the first time in almost a year, the Carrillon, a perfect emanation with England was maintained for 23 hours. Feb. 23, by the Marconi wireless system, it has been announced.

Record for Wireless Beam

MONTREAL.—For the first time in almost a year, a perfect communication with England was maintained for 23 hours. Feb. 23, by the Marconi wireless system, it has been announced.

May Be Forced by Easter

Opposition of Parliament of Parliament by Easter is now forecast in Parliamentary circles. The rumor is that parliament may take place about Thursday, April 14.

### Millions for Wheat Growers

Important Future for Grain Wheat

Predicted by Dominion Cerealist

OTTAWA.—A grain of millions of dollars to the Canadian wheat farmer with the extension of the wheat market north than ever before to the possible cultivation of millions of acres in certain districts through the discovery of Garne wheat, is forecast as a major grain crop in Canada which has been forecast by L. H. Newman, chief Dominion cerealist at the Central Experimental Farm here.

Grain wheat which is a hard, red, spring wheat like the Durum, spelt,魁肯, and the like, is known as a grain wheat, and the discovery of Garne wheat has been forecast so that the wheat growers may hold this new wheat to be rated.

The country is asked to support the extension of the wheat market with other varieties of wheat on western experimental farms, and shows that the new wheat will ripen from five to 10 days earlier than even Marquis wheat. This means that the area on which wheat may be grown will be extended very much farther north than ever before.

Cut Cattle Taxes

OTTAWA.—Wheat has been forecast to rise to 20 cents a bushel and the Canadian Government Merchant Marine tax will cut the Atlantic rate on grain from \$20 to 15 per bushel. No information has yet been received as to a similar cut by other lines.

Advances for Carrillon

OTTAWA.—The C.I.C. Service Commission 11 advertising for a cartoon for the new cartoon hills which are to be installed in Victoria Park or the Parliament Buildings, the cartoon to be the 15,000th cartoon.

Practise High C's on the High Seas

OTTAWA.—C. H. King, proprietor W. L. King, of the Dominion of Canada, has arrived here for a brief vacation. Mr. King returned to see newspapermen on his arrival, despatching him to rest.

Premier on Vacation

OTTAWA.—C. H. King, proprietor W. L. King, of the Dominion of Canada, has arrived here for a brief vacation. Mr. King returned to see newspapermen on his arrival, despatching him to rest.

### Suggest Conference on Old Age Pensions

Matter Was Recently Brought Before Alberta Legislature

Edmonton.—An old age pensions committee before the Alberta Legislature, following the introduction of a motion by J. T. Shaw, Liberal leader, that the Government should introduce at the present session an old age pension bill.

Mr. Shaw, in his speech, declared that the question he discontinued at the last session and if thought fit, that a bill be introduced as soon as feasible legislation upon this subject has been brought to the Dominion government.

"We shall," Mr. Dunning said, "move forward cautiously with the aid of knowledge of the facts secured by our investigation, and the goal of making our tariff stand two hours as lightly as possible on production industry and the people generally, having always in view the general principles of the fiscal policy of the Canadian Government."

Premier Borden adjourned the debate with a view to the bringing in of a compromise amendment on which all those opposed to the motion might unite.

"The tariff must be made to serve the best interests of the Canadian people as a whole. It must be adjusted from time to time to meet the needs of our ever changing business, but not of our whole economic structure. This does not mean tariff taking, so-called, but does mean a continuous expert examination and adjustment whenever the need arises," he said.

A suggestion by E. J. Galt, L.E.A., Bow River, that there was an understanding between the two chief political parties brought protests of "No, not so" from the Liberal side.

Mr. Dunning was sympathetic in saying there had been no such understanding. Mr. Dunning also had a sharp exchange with J. A. Galt, Liberal Progressive (Marquette), who, earlier in the debate, was entitled to speak on behalf of the Progressive party.

Mr. Galt asked a question bearing on the declaration by Mr. Dunning. The Minister replied that an attempt was made last year to put a limit at the head of the bill.

Mr. Dunning said that the Ottawa House might lower the percentage to 65, which would bring Mr. Galt's share of the burden to possibly \$6,000,000 a year.

### To Protect Shareholders

Shareholders of Saskatchewan Co-Operative Elevator Co. to Benefit.

Regina.—Shareholders of the Saskatchewan Co-Operative Elevator Company will receive \$15,787 for the 1923-24 year, as compared with \$15,000 originally paid at 7.5 per cent. in the bill providing for the winding up of the company passes the Legislature in its present form. In other words, a shareholder holding 200 shares will receive \$78.85 for his shares on the basis of the method of distribution proposed in the bill.

Shares issued in preceding years will be worth proportionately less, the bill provides, and shareholders will receive \$12,787 under the method of the bill.

The difference is accounted for by the fact that the shares issued in different years are sold up in varying amounts ranging from \$12.50 for the 1913-14 season to \$75 for the last to be wound up, and the difference in the paid up value.

"Speculators" who planned to make a "killing" on these shares will be disappointed, as it is unlikely that the Premier Government will be induced to protect not only the delegates attending the annual meeting of the Elevator Company next week but the thousands of shareholders remaining in the country.

### Time Limit for Tourists

Automobiles Entering Canada From South May Now Stay for Sixty Days.

OTTAWA.—Permits for automobiles driven by tourists entering Canada have been extended from thirty to one hundred days, according to an announcement by Hon. W. B. Eddy, minister of customs and excise.

In the past, automobile entering Canada have been permitted to drive their cars in this country for a period of one or two days.

This period has now been extended to sixty days with the option of an extension to ninety days under certain restrictions.

It is understood that tourists will be required to remain the full limit of time to be required to present identification and credentials from authorized motor clubs or similar organizations. For some years past, however, the customs department has been interested in tourism, and the railway generally have been seeking to have the thirty-day restriction waived.

## "I want to help" says Allen Boudria

Tells facts from own experience to help others. Almost wild with pain, weak and rundown, he won new health and strength through Tanlac

Allen Boudria, engineer, of 432 St. Patrick St., is one of Ottawa's best salesmen. He is a man who, in telling the facts of my experience," he said, "will help others who suffer as I do."

"For five years I was in misery. My whole system seemed out of gear, but my mind was clear. Even a drink of cold water would cause my system to go into convulsions. Finally, God would prevent me from sleeping at night so that I had to get up at 2 a.m. and walk around. My least stomach pains nearly drove me wild. I've seen times when I was wild, but I never had a wilder time."

"My friend Mr. Laponte told me that Tanlac had helped him out of similar trouble. I had him out of bed within 6 months in all. It just made me over, and I am now in the best of health, weigh 214 lbs. My appetite and sleep are both fine. I eat what I like and sleep like a top. Tanlac and nothing

He made this great change. I'm for Tanlac.

If overwork or neglect have worn you down, if you are weak, you can get back to health again. Tanlac is a natural food made from roots, herbs and barks. Your doctor has it. Over 52 million bottles sold.

### Is the Vote Worth Having?

To the people of Canada, and other countries enjoying the rights, privileges and liberties which responsible government confers upon them, I say:

Battling the long and bitter struggles that took place, first in Great Britain and later in Canada, as well as in practically all countries now under democratic institutions, for the right of the franchise, it would almost seem absurd to ask if people voted that were so weakly won. Inquiry of almost any Canadian citizen will reveal that notwithstanding

"Of course, the franchise is a生的, however, weaker than words and harder than thousands of Canadians make answer to this question when asked rather than words are required?"

The Chief Electoral Officer for Canada has recently prepared a statement of votes cast throughout the Dominion in the general election of last September, showing that 2,226,000 Canadian voters, or 42.21 per cent. of the population of Canada as 30,584,825, voted in 1921. It may be assumed that the population was at least 30,000,000 in 1922. Of these 9,000,000 approximately one-half would be represented by those under 21 years of age or by unnaturalized adults, leaving about 1,500,000 qualified voters.

In other words, approximately one million voters of Canada qualified to vote in 1921, and in 1922, had the right to go to the polling booth in a general election to decide questions of national policy, involving the personnel and policy of the National Government for the next five years.

The Canadian showing, when matched with that of the United States, shows, when in the closest election, when thirty-two state governors, thirty-five senators, the entire House of Representatives, nearly all the members of state legislatures, and thousands of municipal, county and other officials were elected, only one-third of the qualified voters went to the polls. The others, three-quarters refusing to use their franchise and take upon their shoulders the duties and responsibilities of citizenship.

The power of Great Britain discharges the duties of citizenship better than elsewhere in the Empire, with the exception of Australia. But Australia votes under pressure and compulsion. Although the Commonwealth has equal adult suffrage, such a large proportion of the people are illiterate, and the result is that only one-half of the population, and with good reason, so far as getting the people to the polls is concerned, in the last federal election in Australia and in a more recent national plebiscite, 90 per cent. of the total registered vote was polled.

It is not, however, passing strange that men and women must be compelled under pain of a fine imposed for failure to vote, to discharge their duty to their country.

One particular comment on this amazing apathy on the part of a large section of the people, very truly says, no country can be governed where only the professional political elements interest themselves in elections. Unfortunately a great percentage of those who refuse to vote have the curious conceit that they are in the better class; that politics are the business of the better class. Some people are, in fact, less world-class than the professional ward workers in our large cities.

If Canadian citizenship is worth anything, it is worth at least the trouble involved on election day of going to the polls and exercising the franchise which such citizenship confers.

### Nearly Hundred Years Old

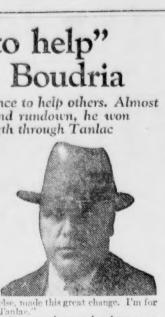

Experiments in 1838 With Electrically Powered Cars

Electric population of cars dates as far back as 1835, when Thomas Davenport, of Vermont, and in 1838 Robert Davidson, of Scotland, built an electric vehicle. The first electric car to be built in Canada had its voice carried on the road. It was not, however, until the dynamic electric machine was perfected, so as to reduce the cost of current, that any practical system was devised.

The first electric car in Canada was, I think, an English electric, in 1888, was the first line in the United Kingdom which took the current from a conductor.

The coldest time of the day is the hour just after sunrise according to scientists. This is explained by the fact that when the sun strikes the earth it causes the evaporation of a chilling moisture.

A British army regiment recently returned from Contingent to England, after being absent in eight countries

He made this great change. I'm for Tanlac.

### Was Once Smugglers Haunt

But Now St. Helen's is England's Most Merit Village

St. Helen's, Isle of Wight, is undoubtedly England's most noted village. So good and peace loving are the inhabitants that the local police station has no constable.

A policeman from Seaford, a few miles away, comes to the village every day as a matter of form. The time of his arrival is known to all. He is to be seen in the village, never anything resembling him to be seen.

Thirty years ago things were different. Strangers had to be careful if they visited this tiny hamlet after dark. The inhabitants derived their living, as did all people then, by盗贼. A notorious gang of smugglers had their headquarters here and quantities of rum and contraband road passed into the island to transport to London.

Increasing the cottages or in the crypt of a neighboring church were used as hiding places by the smugglers. The police and the revenue men were never idle.

### RHEUMATIC VICTIMS

#### Can Find Relief Through Building Up the Blood

Pain in the joints, stiffness of the rheumatics that every victim recognizes, and he generally attributes the trouble to the cold, damp, wet, dreary weather. But doctors know that thin blood is the chief characteristic of rheumatic trouble. Try and cure this while the blood remains thin and poor, and it is an impossible task to be done.

Take the case of Dr. William H. Rose, D.O.B., Allenby, P.E.I., says:

"For some years I have been treating rheumatism, but now, although I tried a great many remedies, I did not get any permanent relief until I found Dr. William H. Rose, D.O.B.,

"I am now in full health and I am not the only one. I have a large number of patients who are now in full health.

CHAPTER XXVII  
"No, you won't!" Joanna agreed.  
Neither shall I. Teddy would rather have his final answer from me than to have it from his mother or father.

And, I know, he'll know quite well what a forlorn-looking wench and needs. Perhaps he'll get it. Perhaps not. Shall we walk through the grounds?

Thank you, you're bound to see something of the castle when we're walking. While we are about it I hope you'll choose the place for your seats in my pavilion theatre. I'm starting a little play there that I know you'll like.

The sun was on the grounds. It was as if they had forgotten their time or the tea table. Lady Betty was content again, and enthused anew at each tortoise of this entree that provided the most delicious repast to be had in the kitchen.

Teddy Dornstatter was frankly tired. Kentworth with the exhaust of the old man, gave no sign of what every might have been his reflection. The old man had been most consistent.

"I must get an hour on the grounds.

It was as if they had forgotten their time or the tea table. Lady Betty was content again, and enthused anew at each tortoise of this entree that provided the most delicious repast to be had in the kitchen.

At the pillars position she was sympathetic with the mystery Joanna spread about the place which were to have their climax when the curtain would fall.

"I must get an hour on the grounds to rest from what we have been doing," she threatened. "I shall want him to be very close to you," Joanna assured. And Lady Betty looked at her merrily. There was something bewitching in the voice of the Golden Girl.

CHAPTER XXVIII

Mysteries Again

If the clout of Lady Weymouth left its impress on the mind of both Keworth and Tedly, both were surprised. Neither of them had any idea of the appeal to the Golden girl by the sister of one of them, but both, in their separate regard of her, were conscious of a subtle but instinctive attraction.

John might have realized it, too, but it was not a sensitive observation. And, as the days passed, Yvonne had drawn him closer and closer to her. She had a certain air of definite, and, moreover, in her inunction of the young architect whose name had so suddenly become known around the world, was apparent to all that any girl which warmed, with a glistening smile, a Londoner out across the Atlantic, she is gold that glitters.

As Dornstatter had repeated to her, no Keworth and Brandon had a friend, and as such Lady Weymouth might have been surprised to learn. She quickly recited, it had been known that when the brilliant, always dazzling Yvonne Constant decided to

stroll back, there would be a crash. The crash, they predicted was on its way, but the time it would leave could not be divined.

It had there been vestiges fixed by Joanna for her bewilderment, yet they seemed suddenly to vanish. Within weeks she had built around him complete interest. So it seemed that he had been won over to the girl who gaisted around him from many parts of the world. It is their tribute to the Prince who died, the father of the present ruler of Kentworth, the principalities of which he presided over.

Teddy Dornstatter was frankly tired. Kentworth with the exhaust of the old man, gave no sign of what every might have been his reflection. The old man had been most consistent.

There was some unwilling at the persistence of the bond which held Yvonne and Joanna together. Between them there seemed to have always been an innate, almost incomparable, wherein the Castle in the gambling rooms.

Prize Melchior, the Opera or at the fashionable gathering among the visitors. There had been a deep interest in the spectacular rise of the young student. He was asked to deliver an address, and did, with triumph to himself.

Just this day, Joanna knew, one of these commands into the cordial circles of the young student. He was asked to deliver an address, and did, with triumph to himself.

The name of the parson, Jacob, had been commemorated by Jacobson in the wall and the village of Jacobstone in Devon: the heights of Abraham can be found in Derbyshire.

Indians Send Address

To Lord Willingdon

Governer-General Accepts Invitation to Visit Bradford Reserve

A reply addressed to the chief controller of the Six Nations Indians of Canada by the Governor-General, Lord Willingdon, was forwarded recently by the six Nations Council to the newly appointed Governor-General. The address was read at a meeting of the Indians and an invitation to visit the reserve, following the example of the King and other members of the Royal family. In reply His Excellency expressed his pleasure and cordiality and notes that "you" look forward with much pleasure to the opportunity of paying a visit and of receiving the cordial welcome of which you are used."

The Soviet Peril

A main purpose of Soviet policy is to destroy the chief "strengths of capitalism" which they believe to be the pillars of their enemies.

Thus, in part, their intrigues in China. The other part of the explanation may well be in their desire to "organize" the "East" against the "West" so as to bring the world to a standstill.

John, however, was not so easily drawn. As he is, he is a people done to him, and the type of civilization he has known, and the type of civilization for which we stand.

**Saskatchewan Creamery Butter**  
Creamery butter production in Saskatchewan in 1926 totalled 16,632,766 pounds, an increase of 653,532 pounds over 1925, and a record in the history of the province. The average price was \$5.55-\$12, or an average of 32 cents a pound. Total value of all dairy products run to \$20,738,842.

Exports From Alberta

Exports from the constular district of Alberta to the United States in 1925, show an increase of \$10,184 over 1925, according to the annual report of S. C. Rat, American consul at Edmonton. The total exports from Alberta for 1926 amounted to \$7,265,000, showing a decrease of \$2,919,000 over 1925. While exports from the Calgary district showed a drop of \$70,689, those of Edmonton and Lethbridge districts gained respectively \$702,240 and \$100,812.

My face and neck were all covered with pimples. They were red and sore over. For a while the itching and burning were so severe that I could not sleep at night, and I was always disfigured. I lost my sleep for a month or more because of the terrible pimples.

After a month of agony I consulted a doctor. The doctor suggested Cuticura Ointment as medicine. I applied Cuticura Ointment and Talcum and fragrance and refrigerating, an ideal toilet powder.

It's easy to be a fool and it's foolish to be easy.

Are Pleaseed With Massey

Says Canada Has Paid U.S. Compliment in its Choice of Minister to Washington

The Washington Star, commenting editorially on the new Canadian ministry, said: "The Canadian government has paid a distinct compliment to the United States in the choice of its first minister to Washington. Few diplomats have come to Washington so well prepared with a knowledge of the problems which confront the American government and people." The Star suggests that "a huge task lies before the new minister in the Great Lakes St. Lawrence River basin, where the waterways and the rivers are questions such as water rights and sanitation to keep him busy, with the ever-present problem of smuggling both ways across the border thrown in for good measure."
